- Race Status added to the display for Horse and Greyhound Racing markets.
- The Advanced Greening Up function. This function allows you to spread the selection profit/loss in any required proportion, not just 50% / 50% as currently the Greening Up function does. Just open the Options screen, the Greening Up page and turn on the "Enable Advanced Greening Up" option.
- Added Each Way market support.
- New shortcuts to add/remove a market to/from the Market Watch List.
- Romanian Betfair (Betfair.ro [1]) support. Now users of Betfair.ro [1] website can use FairBot too.
- Automation: The new Selection Historic Relative Odds condition. This condition allows to compare current odds with the odds that were available some time ago.
- Automation: The new Market Race Status condition. It is now possible to perform some actions when a horse or greyhound race changes its status.
- Automation: The new Change Bet Persistence action. Now you can change the bet persistence of your bets in your automated strategies.
- Automation: Enhanced Selection Volume condition. Now it allows you to calculate selection volume at the specified odds or within the specified odds range.
- Automation: Added the Min/Max/Most traded odds. Now it is possible to use the Min/Max/Most Traded Odds in your actions and conditions.
- Automation: Added "% of Balance" staking option for the Dutching action.
- Automation: New offset options (percentage and absolute odds values) in the Dutching action.
- New columns in the Market Watch List. Now it shows the Market Volume, and the Back and Lay side Book Percentages. Also it is now possible to hide unnecessary columns. Just click the "Select Columns..." button in the toolbar.
- Ladder Tick Size Crossover Odds colour. Now FairBot marks the odds (at which the tick size is changed) with a different colour.
- Mouse wheel scrolling is now available in the Dutching & Back/Lay All windows.
- Fixed some problems with application freezing if the "Last Bet" selector is used in automated strategies.
- Other minor bug fixes and improvements.
